Oneplus 7 android 10 update not received

Update: November 25, 2020 (4:15 am ET): After the debut of Open Beta 19 in October, OnePlus 7 and OnePlus 7 Pro receive a new stable update to Oxygen OS. The update is numbered as 10.0.10 globally and 10.3.7 in India and the EU, bringing some touch-ups to the status bar and the Phone app. Also included in the update are the November security update for Android and the August GMS update. Users will have to wait a little longer for their first taste of Android 11.If you are running a stable build of oxygen OS, this update will roll out like an OTA. See changelog below: SystemOptimized user experience of the status bar in the call scene to reduce the mis-touchesUpdated GMS package to 2020.08Updated Android Security Patch to 2020.11Fixed little probability flashback problem with Phone applf you want to switch from the stable channel of oxygen OS to beta, it's really not difficult. Follow our guide here! Welcome to the OnePlus 7 and OnePlus 7 Pro updates hub. Here's everything you need to know about the latest Android updates for the two devices, including their current versions and when future updates are likely to arrive. Both 7 and 7 Pro run Oxygen OS, OnePlus' proprietary Android skin. Oxygen OS is known for fast updates coming in a very long time, so be sure to bookmark this page and visit frequently. Please note that OnePlus 7 and 7 Pro sometimes receive updates at the same time. Please also note that T-Mobile and Sprint variants of the OnePlus 7 Pro may receive software updates at a later date. Buy OnePlus 7 Pro (US) OnePlus 7 and OnePlus 7 Pro updatesBable stable version: Android 10When will OnePlus 7 and 7 Pro get Android 11? September 2020 (estimated)OnePlus 7 and 7 Pro launched on May 14, 2019, with the then latest version of Android, Android 9 Pie. Both devices are expected to receive at least two major Android updates in the future. Unlocked variants of the two phones began to receive Android 10 at the end of September, although many users did not see OTA for several weeks after before OnePlus quietly hailed it because of some annoying bugs. The rollout began again in mid-October when the OxygenOS version 10.0.1.At late December, the Android 10 update for the T-Mobile variant of the OnePlus 7 Pro finally began to roll out. The update came in as Oxygen OS 10.0.1 and included the November 2019 security update. Unlocked 7 Pro models are on Oxygen OS 10.3.0, although it is not clear what features the T-Mobile update is missing, if any. OnePlus has confirmed that the OnePlus 7 Pro 5G will eventually be upgraded to OxygenOS 10 - although users will have to wait until Q1 2020 to see it. What have 2020 done so far? Right after the beginning of the new year, OnePlus released the latest Oxygen OS Open Beta 8 builds for OnePlus 7 and OnePlus 7 Pro users. This update brought several bug fixes, including touchscreen optimizations and camera performance adjustments as well as for Dec. In mid-February, OnePlus launched the oxygen operating system oxygen operating system Beta 9 build and oxygen OS 10.3.1 stable update for OnePlus 7 Pro. Both updates include several bug fixes, tweaks and January security update. In March, the OnePlus 7 Pro 5G was also updated to the stable version of Android 10. This exclusive version of Oxygen OS 10 landed as a 2GB+ download and its changelog was the same as the one for the OnePlus 7 and OnePlus 10 update. Later this month, OnePlus 7 and OnePlus 7 Pro received the new Oxygen OS Open Beta 10 update. According to a post on OnePlus Forums, the update included the security updates for February 2020, as well as some bug fixes and system optimizations. The Open Beta 11 update followed shortly afterwards, bringing the March 2020 security update, as well as the instant translation feature. This feature translates audio in video calls into native languages for users: who support English, French, German, Hindi and Chinese. March 2020 was also the month when OnePlus 7 Pro 5G devices on Sprint were finally updated to Android 10. Not long after saw the EU variant OxygenOS 10.0.5 OTA, which introduced general bug fixes and tweaks. On the last day of the month, OnePlus released the stable OxygenOS 10.3.2 update with the March 2020 security update in tow for the OnePlus 7 and OnePlus 7 Pro. This provided better RAM management, stability in slow mo recording, flow of video playback and more. The company released the Open Beta 13 update on June 8, 2015. OnePlus in June brought a new Dark Mode toggle in the notification bar, tweaks to the dial-up interface, and a number of bug fixes. The June 2020 Android Security update also came in tow. In August, Open Beta 17 brought a new user assistance feature to help onboard new OnePlus users, optimizations to File Manager and Wi-Fi transfers, and the Android security update for August 2020.Mid-September saw the rollout of Open Beta 18 for OnePlus 7 and OnePlus 7 Pro that packed a long list of customizations and improvements to Game Place and Community Apps. The update also included the September 2020 Android security update and the SEPTEMBER 2020 GMS package. On October 1, the OnePlus 7 Series received Oxygen OS 10.0.8 in India and other global markets, and 10.3.5 in the EU. It brought improvements in system power consumption, patched various system stability issues, and added Android's September security update.Oxygen OS 10.0.9/10.3.6 rolled out at the end of October and brought with it the same changelog as the previous update. Open Beta 19 arrived at the end of October, bringing with it general stability improvements, the Android security update for October and a solution for the front camera flash. The OnePlus 7 series is expected to see Android 11 in 2020. It is possible that it will also receive an update to Android 12 in 2021, when The OnePlus 3T received three updates during its lifetime (to Nougat, Oreo and Pie). Looking for another device update? Go to our general Android 10 update tracker at the link. New updates will be added at the bottom of this story..... Android 11 update tracker for all the major OEM and operators OxygenOS 11 known bugs and problems tracker Android 11 stable update-related bugs/problems/problems tracker - NY Original story (published on July 14, 2020) follows: OnePlus has less than a decade in the smartphone industry, but it sits well above a number of big names in the industry for a few or so reasons. Besides value for money, the thoughtful OxygenOS skin continues to attract more people to OnePlus phones. Think of it as feature-packed stock Android. OnePlus has managed to carve out a set of features based on what society wants, and the end result is an OxygenOS skin that doesn't too get into the way Google intends android to work while taking general functionality a notch higher. At the time of writing, the latest stable version is OxygenOS 10 based on Android 10. It came out three weeks after Google rolled out the stable version of Pixels. If anything, nothing different is expected with regard to the stable version of OxygenOS 11 based on Android 11. To ensure this happens, OnePlus has already started testing the beta version of Android 11. The software was released in mid-June 2020 for the OnePlus 8 and OnePlus 8 Pro, but it is not suitable for use as a daily driver, yet. More OnePlus phones are expected to join the party, more after the stable version rolls out to the OnePlus 8 and 8 Pro, probably in September or October 2020. To know if your OnePlus device will get this update, route here. As for this article, we keep track of oxygenos 11 update progress, and closely monitor the release of beta and stable versions to different OnePlus devices. We will regularly update the article to reflect the latest news. New updates will be added to the section below Update 1 (July 29) OnePlus CEO, Pete Lau has dropped a hint on Twitter suggesting that OxygenOS 11 based on Android 11 will bring the long-awaited Always on Display (AOD) feature to OnePlus devices. See the full story here. Update 2 (July 30) Based on new information, it seems that OnePlus can enable support for 5G on the O2 network in the UK with the release of Android 11 (OxygenOS 11) on OnePlus 8, 8 Pro and OnePlus North. See the full story here. Update 3 (August 1) According to a post on Weibo by OnePlus CEO - Pete Lau, the HydrogenOS 11 update will soon arrive in China. HydrogenOS 11 is the Chinese equivalent of OxygenOS 11 that will release globally Android 11. Check out more details here. Update 4 (August 04) OnePlus CEO - Pete Lau has confirmed - through a post on OnePlus OnePlus forums that the company will release the final developer preview build of OxygenOS 11 on August 10. After that, the company will release Open Beta for all interested users to experience Android 11 before the official release. Update 5 (August 06) OnePlus is now teasing users with upcoming features that come with the OxygenOS 11/HydrogenOS 11 update based on Android 11. The new features include Zen Mode 2.0, dark mode with scheduling, always on-screen, and more. See the full story here. Details here. Update 7 (August 11) Android 11 (OxygenOS 11) beta 3 update is now released for OnePlus 8 and OnePlus 8 Pro. The new update brings a bunch of new features and improvements. See the full story here. Update 8 (August 12) OnePlus has added several new features with the Android 11 (OxygenOS 11) beta 3 update that it released yesterday. If you want to check out most of what's new with the update, you can go here to see the new features in action in a video. Update 9 (August 14) Some applications available on OxygenOS 11 and HydrogenOS 11-based on Android 11 appear to be running on OnePlus phones with Android 10. For more information on the case, head here. Update 10 (August 31) IST: 6:42 am: While OnePlus released OxygenOS 11 beta 3 earlier this month for OnePlus 8 and 8 Pro, says that the next update would bring the Open Beta version of Android 11. It appears that the company has encountered some unexpected errors that need to be resolved and has thus released the beta 4 update. Read the full story here. Update 11 (September 02) IST: 9:35 am: Some recent reports suggest that OnePlus will bring Rich Communication Services (RCS) support with Android 11 update. It has also been reported that the OxygenOS 11 Weather app is now available for all OxygenOS 10 devices. Read the full story here. Update 12 (September 04) IST: 6:46 am: With the release of OxygenOS 11 developer preview 3 update, OnePlus introduced a new design language for its custom skin over Android 11. The company has provided some insight into why it made certain design changes that you can check out here. Update 13 (September 08) IST: 5:55: OnePlus 8 and OnePlus 8 Pro users with Chinese variants can now join the public beta program to try HydrogenOS 11 based on Android 11. The update is currently reviewed by Google before it can be published. See the full story here. Update 14 (September 09) IST: 10:19 am: Google has officially announced the release of Android 11 to the public. It has also stated that Android 11 will also be released for select OnePlus devices among devices from some other OEMs. Android 11 will roll out today on selected Pixel, OnePlus, OPPO and realme phones, with more partners launching and upgrading devices over the coming months Of course we will update tracker when Android 11 starts rolling out for OnePlus phones so stay tuned to PluinkaWeb. Update 15 (September 10) IST: 6:15 a.m.: According to a new report, OnePlus has released a new version of the Notes application that brings the new OxygenOS 11 design language to the app. It is available in the Google Play Store as an Early Access version. Sam Twist, senior product manager at OnePlus, reportedly also mentioned that OnePlus is now shifting its focus to the generalist population with the OxygenOS 11 skin instead of focusing solely on enthusiasts. IST: 6:39 p.m.: OnePlus is yet to release Android 11 for the OnePlus 7 series, but the devices have picked up the update via the latest Android 11-based CarbonROM 8.0 version. Moreover, it seems that the Indian variants of The OnePlus 8 and 8 Pro will get the OxygenOS 11 Open Beta update soon. See all the details here. Update 16 (September 11) IST: 10:20: Based on the teardown of the OnePlus 8 series latest Open Beta, it is reported that OnePlus can bring 8K 960fps video recording in the OxygenOS 11 (Android 11) update. IST: 6:20: OnePlus plans to bring the front camera's nightlight function via the official OxygenOS 11 (Android 11) builds at least to the OnePlus 8 series. Go here for full coverage. Update 17 (September 12) IST: 1:40: OxygenOS 11 open beta update on the OnePlus 8 series (OnePlus 8 and 8 Pro) has broken the Google Assistant start gesture (swipe from the corner). What is good is that one of the employees has confirmed that the developers are working on this. Details here. Update 18 (September 14) IST: 6:00 AM: OxygenOS 11 Open Beta 1 update brought together several errors. Fortunately, repairs in the works for certain issues such as the green tint, the Spotify queue, the Messenger bubble and some other issues. See more details here. Update 19 (September 17) IST: 3:49: In case you were looking for a way to get OnePlus 8 Android 11 beta live wallpapers on your Android phone, you're in for some luck. These cool live wallpaperes have been ported for all devices running Android 8.0 Oreo and above. Check out all the details here. IST 5:22 pm: OnePlus has officially released Android 11-based HydrogenOS 11 Public Beta for OnePlus 8 and OnePlus 8 Pro. Interested users in China can check out the new beta software by going here. Update 20 (September 18) IST 1:44 AM: In an FAQ posted by OnePlus, the company went further and addressed some of the changes they have made to OxygenOS 11. The FAQ post also sheds light on the OnePlus 8 Live Wallpaper animation issue that will apparently be resolved via upcoming updates. Update 21 (September 21) IST 11:50 am: OnePlus was one of the first OEMs to roll out the Android 11 beta for its flagships. But older phones like the OnePlus 6 won't get the update anytime soon. But can check out Android 11 on OnePlus 6 thanks to the latest POSP ROM. Update 22 (September 23) IST 6:13 pm: In a recent interview, Sam Twist, Senior Product Manager at OnePlus, offered some new insights for the development of OxygenOS 11. When asked about India-specific features, Sam said the company is piloting some features in the country such as the Work-Life Balance feature and The OnePlus Scout. However, OnePlus intends to make the same features available globally. Moreover, when asked about inconsistencies with the menu options, Sam argued that we want the power to sleep with the user and provide as many options as we can to create a more intuitive experience. Update 23 (September 24) IST 11:09 am: OnePlus has released OxygenOS 11 Open Beta 2 update based on Android 11 for OnePlus 8 and OnePlus 8 Pro. This new update brings together some fixes and improvements as well as the Canvas feature. More details and download links here. Update 24 (September 25) IST 12:53 pm: The Chinese OEM has now begun rolling out Android 11-based HydrogenOS 11 Public Beta 2 for OnePlus 8 and OnePlus 8 Pro in China.
